# **1 The Muffin Man**

## **1.1 Making Muffins**

There is much to consider when making muffins.

### **1.1.1 Choosing the Right Ingredients**

Any Muffin Man knows the right selection of bacon can make or break a good muffin. Basically you can type whatever you want here and LaTeX will format it nicely for you.

### **1.1.2 Mixing**

Put your back into it.

### **1.1.3 Into the Oven**

Preheat your oven to  $\frac{1}{\pi} \sum_{i=0}^{\infty} e^i$  degrees.

## **1.2 Sellings Muffins**

### **1.2.1 Presentation**

Ugly looking muffins won't get bought.

### **1.2.2 A Good Store Front**

People won't come into a shady looking place, no matter how good your muffins are.

### **1.2.3 On Wit and Charm**

When all else fails, hope you rolled a good CHA stat, and be a gentleman.

# **2 Academic Administrator**

## **2.1 The Power of the Academic Admin**

The Academic Admin does not have any jurisdiction over the role of System Administrator. The Academic Admin role assumes all functions of and can change/update any material provided by the following users:

- Assistant Academic Administrators
- Instructors
- TA/TMs

## **3 Logs**

There are two distinct types of logs: Academic Logs and System Logs.

### **3.1 Academic Logs**

The academic log contains all records of additions and changes to the academic records. The academic log documents grade and assignment modifications. The academic log is visible to every user excluding the Ta/Tm marker.

### **3.2 System Logs**

The system log contains a record of the systems tasks. It documents user sign-ins and system backup times. The system log is only visible to the System Administrator.
